Projects

(Jul,2022 - Present)

EPADS(E-PAK ACQUISITION & DISPOSAL SYSTEM)

I worked on EPADS (E-Pak Acquisition and Disposal System). This project belongs to government of pakistan. The objective of EPADS Automation System is to automate all the procurements, increase the productivity and efficiency as well as to reduce corruption. It is indeed a matter of honor for me as a developer to serve my country and nation by working on this project.

- **Project of Government of Pakistan**
- **Funded by World Bank**
- **Tools & Tech :** Asp.net core, Angular 12, Microsoft SQL, Bitbucket, Jira

(Aug,2024 - Feb,2025)

HRM(HUMAN RESOURCE MANAGEMENT)

Developed and implemented a comprehensive Human Resource Management (HRM) system designed to streamline HR operations, including employee data management, recruitment, performance tracking, and payroll processing. The project involved integrating multiple modules for attendance, leave management, and employee performance reviews, while ensuring a user-friendly interface and data security. Collaborated with cross-functional teams to tailor the system to organizational needs, enhancing efficiency and decision-making within the HR department.

- **Tools & Tech :** Asp.net core, Postgresql, Git
- **Part Time - (Remote)**

(Feb,2022 - Jul,2022)

PSDP (PUBLIC SECTOR DEVELOPMENT PROGRAM)

I worked on PSDP (Public Sector Development Program). This project belongs to government of balochistan, planning & development department. The objective of PSDP automation System is to incentivize the government to bring transparency and increase the efficiency in the province. It is indeed a matter of honor for me as a developer to work on this project.

- **Tools & Tech :** Asp.net core, Angular 9 , Microsoft SQL , Git
